

Gilded Aura — Modular Male Character Free Pack

Creator: Trines Studio

Overview

Gilded Aura is a modular male character sprite pack made from transparent PNG layers. Use the assets in visual novels, games, prototypes, illustrations, and other finished creative projects.

The layers can be combined in image editors and imported as a Ren'Py layered image using the same folder structure.

About the Character

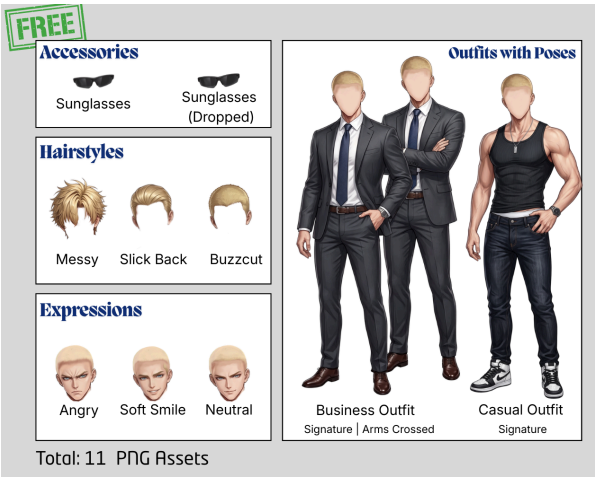

Gilded Aura is a single character with a fixed identity — confident, sharp-eyed, a little mischievous. His face, build, and presence carry through every layer combination in this pack.

This pack lets you style him: change his outfit, expression, hairstyle, and accessories, scene by scene. What stays constant is who he is.

This Gilded Aura Modular Male Character Asset Pack was produced using a combination of AI-assisted generation and human curation, direction, and refinement. Character concepts, design direction, artistic curation, and final outputs were conceived and executed by Trines Studio.
